DETAILED ACTION***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-4 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 of copending Application No. 10/014,980. Although the conflicting claims are not identical, they are not patentably distinct from each other because '980 claims a stabilizer system and oil (fatty acid and glycerides) as in the instant claims (claims 1 and 2 of '980).

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1761

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Kumabe et al. (5,853,761).

Kumabe et al. disclose as in claims 1, 2 and 3, a composition containing a stable preparation when added to a beverage made of highly unsaturated fatty acids such as docosahexaenoic acid (DHA) and EPA (eicosapentaenoic acid), pectin and alginic acid (abstract and col. 1, lines 54-64, col. 2, line 13, and line 21). DHA and EPA both have double bonds and a fatty acid chain from 9-25 carbons.

Amounts within the claimed amounts are used as in claim 4 of 12 grams as in table 3 (col. 4, lines 5-25).

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Montezinos.

Montezinos disclose a beverage which contains pectin and glycol alginate and oil in a flavor emulsion (col. 1, lines 51-60) and (col. 4, lines 60-70).

Allowable Subject Matter

Claims 5-29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims and if a terminal disclaimer was submitted.
